

PRESS RELEASE

ECO3 brings complete, sustainable flexo solution to North America

Carlstadt, United States – May 5, 2025

ECO3, a leading global supplier of prepress solutions, will showcase its complete flexo solution, MAGIS, at North America's most important flexo event, FTA FORUM INFOFLEX. Designed specifically for the narrow and medium web market, MAGIS empowers modern flexo printers to maximize efficiency, enhance quality, and operate more sustainably, all with fewer resources.

Flexo professionals can now manage every step of the production process more efficiently and sustainably, all with one fully integrated solution. From a dedicated all-in-one PDF workflow and image enhancement software to premium press-ready aqueous and solvent flexo plates, ECO3 delivers a seamless, end-to-end system.

At the heart of the solution is ECO3's cloud-based workflow platform, Amfortis, which automates prepress tasks, improves collaboration, and minimizes waste. From file to plate, production becomes faster, smarter, and more reliable.

A key innovation is SPIR@L screening, which ensures precise dot control for sharper detail, vibrant color, and consistent results. Paired with GridTune surface patterning, the system helps reduce costs while supporting greater sustainability.

The MAGIS plate system uses a dry film lamination process to create stable flat-top dots, consuming four times less energy than traditional LAMS plates. This results in faster processing, reduced energy use, and greater press stability. In addition, the MAGIS P-Eco Water Wash plate system features an inline filtration system that removes 100% of solids from the washout water without using any chemicals.

ECO3's broad portfolio offers a one-stop solution for a wide range of printing requirements, and the total cost of ownership of our open systems will be especially appealing to printers and converters seeking an alternative to their current suppliers.

"We invite you to Level 2, Booth 520, to see how our total flexo solution approach can help you achieve the highest image quality, reduce waste and costs, and improve sustainability. Talk with our experts who can help you find a solution that's right for you."
