

PRESS RELEASE

The future of print is now. See how a new integrated solution from ECO3 and Graphic Communications (formerly Print ePS) is shrinking deadlines, reducing mistakes and lowering costs.

Mortsel, Belgium – October 17, 2025

ECO3 and Graphic Communications, a division of CAI, will demonstrate at the upcoming PRINTING United Expo how their partnership delivers a fully integrated and tailored single workflow solution, allowing customers to print smarter, optimizing productivity, improving quality and reducing costs.

Graphic Communications and ECO3 deliver an unparalleled all-in-one workflow solution, incorporating every aspect of the entire production process.

Customers gain full control over their entire production - from customer and order acquisition, job and financial management, to production and postproduction - enhancing efficiency and productivity across operations while reducing costs. Scalable, to meet any workload, the solution allows customers to automate at their own pace.

"Together Graphic Communications' MIS/ERP solutions and ECO3's prepress software are helping printers automate labor-intensive processes to increase efficiency and sustainability, while transforming business operations," said Doug Surret, General Manager & Chief Commercial Officer, Graphic Communications.

Customers can shorten deadlines by integrating commerce and online web approval, optimizing press layouts dynamically, improving efficiencies and lowering print costs while improving quality with management tools that enable "first-time-right" print production.

Attendees can schedule an individual demo at Graphic Communications Booth 3206, October 22–24, 2025, at the Orange County Convention Center in Orlando, Florida, and see how automated workflow solutions can help optimize production and lower costs while improving quality.

"PRINTING United Expo is the culmination of all the global ECONNECT25 roadshows ECO3 and Graphic Communications have presented together in 2025, events where customers experience the latest print innovations firsthand, engage with industry experts and learn how to develop the workforce of the future," said James Struble, Director of Software Sales, ECO3 North America. *"We look forward to our continued collaboration in 2026."*
