

Solidus meets its sustainability goals

Solidus introduced SPIR@L and SolidTune screening at its Hoogstraten plant in the spring of 2022. Filip Peeters, Senior Specialist Digital Prepress, says, "Our ink consumption has significantly reduced. The print quality has improved and become more stable: in particular, we are experiencing fewer problems with ghosting."

Visit our new Flexo Lab in Belgium

If you're a label or packaging printer looking for an open system to process jobs and produce flexo plates in-house, the new Flexo Lab in our ECO3 headquarters in Belgium is a must-visit.

[Contact Us](#)

Our team of specialists can demonstrate our complete solution, from the [Amfortis prepress workflow software](#) to our MAGIS [direct imaging](#) and [flexo plate creation](#) portfolio. Quality enhancement tools like SPIR@L and GridTune complete the picture.

New in our portfolio

APOGEEPROOF Satin proofing paper

The new APOGEEPROOF Satin 200 & 250 proofing papers with microporous resin coating are the ultimate choice for proofing applications where precision, speed, and quality are paramount. Both substrates are Fogra51 certified.
