Minimize waste in flexo plate-making

MAGIS Eco ReFlow is an innovative closed-loop filtration system that recycles process water from the plate processor used to wash out aqueous MAGIS flexo plates. It significantly reduces waste and resources use in flexo plate-making.

Leveraging the Apogee advantage

"Less human touches means fewer errors, so we are lowering the cost of production while streamlining the whole process. It's a huge lifesaver!" Tom Moe, CEO of Daily Printing, is happy with the efficiency gains that their Apogee workflow software delivers.
