### Introducing Amfortis v4 and PackIQ

Version 4 of our Amfortis workflow software increases automation and improves integration. It helps packaging printers and converters manage shorter runs, tighter deadlines and more complex customer expectations. The new release also introduces PackIQ, an automation module that streamlines prepress by intelligently combining incoming files into ready-to-produce jobs.

### Robotic plate loading boosts efficiency at EversFrank

EversFrank in Germany has installed two new Avalon N48 CtP systems with fully automated robotic plate loading and a stacking line. The company is part of the Stibo Complete group. Stibo began its automation journey six years ago, when it installed its first plate-loading robot. Their three robotized systems streamline plate handling, reduce production time and lower operational costs.

## Featured products

### ANTURA plate cleaners

You want your offset plates to perform perfectly. Every plate needs its specific cleaner to meet the requirements of its unique composition. Our ANTURA cleaning products are developed or selected to ensure the maximum productivity and protection of your printing plates. [Discover ANTURA cleaners](#)

### MAGIS DI direct imagers for flexo

Our MAGIS digital imaging systems are available in different configurations for sizes up to 1,270 by 2,032 mm. They support MAGIS F 830 dry film as well as flexo and letterpress plates. The bundled software can import 1-bit TIFF data, which all the major workflow systems on the market can generate. [Check out MAGIS DI](#)
