Lean printing in action: Merkur Grafisk's smarter way of working

Leading Norwegian print company Merkur Grafisk centralized its full production chain for books, magazines, retail materials, interior applications and décor in a new facility in Langhus. They rely on their Apogee workflow to automate prepress, cut clicks per job and reduce errors.

Unlock the Flat Top Dots Decoded guide for flexo printers and converters

Print instability rarely starts on press. It often starts at the dot level. Inconsistent dot formation increases pressure sensitivity, make-ready time and waste. That's why flexo converters assessing plate performance focus on flat top dots. Our Flat Top Dots Decoded guide explains how dot geometry and caliper consistency impact real press behavior, especially when moving platemaking in-house.
