ECO3 BV
Septestraat 27
2640 Mortsel
Belgium

Dear partners and stakeholders,

The world is increasingly demanding that companies across all industries act responsibly toward both the environment and society. The printing industry is no exception. At ECO3, we are committed to contributing meaningfully to this responsibility. Economy, Ecology, and Extra Convenience are not only values we promote, they are part of our corporate DNA and the products we design.

Implementing sustainability is not something that happens overnight. It asks us to pause, reflect, and adjust as we go. The deeper we explore, the more we uncover, and with that comes new challenges and responsibilities. We have already taken meaningful steps forward to build a strong foundation for the ambitious, measurable goals we aim for tomorrow.

ECO3 therefore commits to:

- Reducing the environmental impact of our products and operations, with a focus on waste, water, energy, and chemical use.
- Designing solutions that support circularity, resource efficiency, and more sustainable production practices across the printing lifecycle.
- Applying recognized standards, certifications, and independent assessments to measure and validate our progress.
- Progressively engaging suppliers to align with our values on ethics, human rights, and sustainability.
- Reporting openly and consistently, showing both progress and areas where further improvement is needed.

Sustainability at ECO3 is not a single initiative. It is an ongoing commitment that grows through collaboration, learning, and shared accountability. We invite you, our partners, customers, and collaborators, to join us on this journey. Together we can create solutions that respect both people and planet and make printing fit for the world of tomorrow.

Sincerely,

Christian Tebroke
CEO
