

PRESS RELEASE

ECO3 and eProductivity Software showcase high-productivity, seamless, end-to-end workflow solutions at PRINTING United Expo

Carlstadt, New Jersey – September 5, 2024

ECO3 and eProductivity Software (ePS) demonstrate how their strategic partnership will push automation in print production to the next level at the upcoming PRINTING United Expo. With fully integrated and tailored workflow solutions, this collaboration delivers an unparalleled single workflow solution, incorporating every aspect of the entire production process.

Customers gain full control over their entire production (from customer and order acquisition, job and financial management, to production and postproduction), enhancing efficiency and productivity across operations while reducing costs. Scalable, to meet any workload, it allows customers room to grow.

The integrated ePS and ECO3 automated workflow solutions help customers shorten deadlines, reduce mistakes and optimize production choices.

Customers can shorten deadlines by integrating commerce and online web approval, optimizing press layouts dynamically, reduce turnaround time while improving efficiencies, and lower print production costs while improving print quality with management tools that enable "first-time-right" print production.

Attendees may schedule an individual demo at the upcoming PRINTING United Expo, ePS Booth #C2877, September 10 - 12, at the Las Vegas Convention Center and see how our collaborative, integrated workflow solutions can help printers automate, optimize production, and lower print production costs while improving quality.

Contact Mark.Gallucci@ECO3.com to schedule your demo.

About eProductivity Software

eProductivity Software is a leading global provider of industry-specific business and production software technology for the packaging and print industries. The company's integrated and automated software offerings and point solutions are designed to enable revenue growth and drive operating and production efficiencies. eProductivity Software is headquartered in Pittsburgh, Pennsylvania with offices worldwide.
